**MICRO ART STUDIO**  
SOMETHING SMALL FROM POLAND

This set is compatible with other sets  
from this range.

Designed for  
GAMES  
**INFINITY**

## H00002 District 5 Apartment 1

[www.microartstudio.com](http://www.microartstudio.com)

Micro Art Studio laser cut scenery is especially designed for tabletop wargames.

This model is delivered as a pack, unassembled and unpainted.

The parts of the model are designed to slot together in a way that allows for a quick and easy assembly.

Every model is cut from one or more HDF panels 3mm thick.

**Ostrzeżenie:** Ten produkt nie jest zabawką. W opakowaniu znajdują się małe i ostre elementy, nie przeznaczone dla dzieci poniżej 14 roku życia.

**Warning:** This product is not a toy. It is not suitable for children under 36 months due to small parts. Micro Art Studio recommends this product for ages 14 and over.

**Achtung:** Der Produkt ist kein Spielzeug. Die Packung enthält kleine und spitzer Teile, die sind nicht für Kinder unter 14 Jahren Bestimmt.

**Attention:** Ce produit n'est pas un jouet. Dans l'emballage il y a de petits éléments qui ne sont pas destinés aux enfants de moins de 14 ans.

**Atención:** Esto no es un juguete. Este paquete contiene piezas pequeñas, no recomendado para menores de 14 años.

#### Fitting HDF

The outline of the pieces is not fully cut through to ensure they safely stay in the frames in transport. Usually the pieces can be pushed out from the frame they come on. For longer and thinner elements, however, it is best to cut the connecting places with a hobby knife.

Doors and windows in most building sets are not fully cut through and require pushing out if you want to have them open. If you want them closed on your model it is recommended to reinforce them by gluing a piece of paper from the inside to prevent them from being pushed out accidentally.

Before using any glue put the major parts together to ensure all the joints fit all the way through. Trim parts to fit using a file where needed.

Most of the elements are designed to fit tightly without the need for glue. Be careful when connecting small tightly fitting parts as it might be difficult to remove them without breaking.

The laser-cut areas of the HDF stain hands and it is recommended to use examination gloves when handling it.

#### Gluing HDF

Use PVA (white) glue or thick superglue and superglue activator spray (the regular thin superglue does not work). If using PVA glue give the bond several hours to set properly.

#### Painting HDF

We suggest two ways to paint HDF:

1. Prime with matt enamel spray paint. Spray in a well ventilated room or outdoors on a dry day with temperatures 15-30°C (55-85°F). Give it several hours to dry. Afterwards proceed with painting with hobby or artists acrylic paints using airbrush or brush.

2. Prime with matt thick acrylic paint - artist's paint is recommended due to the amount of enamel you will need. You can do this before assembly or after. Then, you can use enamel paints and enamel paint thinner to weather and shade the hdf.

See [www.wolsung-ssg.com/news/hdf-painting-tips](http://www.wolsung-ssg.com/news/hdf-painting-tips)

Before painting it is best to impregnate the corners most prone to wear with a watered down PVA glue or thin superglue.
