

HIMIZU 火-水

R.R.P. 21,95 €

KEY SELLING POINTS

- **Litius Carreras** is the author and illustrator of Himizu, designer of major best-sellers such as **Gold Nugget** and **La Cuenta**.

- Very easy-to-learn rules with a quick table setup. The game maintains tactical tension turn by turn. Each player has 3 of their own power tokens, but during the game they will hand them over to the opponent as they use them to activate their various abilities depending on their character. Using your power means giving power to the other player on their turn.

- A tactical area control game whose board state will change every turn through the interaction of the various tiles, with a feel similar to games like Chess or Checkers, where every move threatens the other player's position.

- High-quality components, compact and portable, with a Japanese atmosphere throughout the game's theme. Exclusively for 2 players.

- Multilanguage: German, Spanish, French, and English.
